Hegel’s Phenomenology of Spirit (1927)

By Martin Heidegger

Introduction

I see empiricism, and news reels, all read as just things passing by. Point at a car, and make a news reel of car history, and then cover these three categories (correction, 1961).

I. Des Geistes First in Science of Logic

A simple thing, World Spirit, and a tragic affair.

II. Worst Alienation, Ruin and Disjoined

I mean the worst alienation.

III. Spirit (Young, Older and Spiritual)

I mean fine, I am fine.

Conclusion:

Louis Althusser (remark after reading Heidegger’s Phenomenology of Spirit in Ecole) – just some bunch of aleatory tendencies again.

Jean Hyppolite (same) – I mean sense, sense-certainty, just the sense covered like a lifting poem.
